

iRobot Roomba 880 Side Brush Motor Replacement

How to replace a side brush motor for the Roomba 880.

Written By: agriewe

INTRODUCTION

If the side brush on your Roomba 880 isn't spinning, it may need a new side brush motor. Here's how to replace it!

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Side Brush Motor

- Remove the two Phillips #1 15mm screws holding the battery cover in place.
- Once unscrewed, remove the battery cover and set aside.

Step 2

- Remove two 15mm Phillips #1 screws beneath each side wheel.

Step 3

- Remove the 10mm Phillips #1 screw holding the side brush in place.
- Once unscrewed, remove the side brush and set aside.

Step 4

- Remove the outer covering.

Step 5

- Remove the three 10mm Phillips #1 screws holding down the side brush motor case.

Step 6

- Take out the side brush motor case.

Step 7

- Remove the 10mm Phillips #1 screw holding down the lid of the side brush motor case.

Step 8

- Remove the piece holding the lid to the case.
- Take off the lid and set aside.

Step 9

- Remove the three 10mm Phillips #1 screws.

Step 10

- Flip over and remove the side brush motor.
- All done!

To reassemble your device, follow these instructions in reverse order.
